THE IOC NETWORK OF GERMPLASM BANKS AND THE TRUE HEALTHY OLIVE CULTIVARS PROJECT

SEMINAR

Cordoba (Spain), 21-24 October 2019

INTRODUCTION

The IOC has been promoting a network of banks containing olive genetic material since 1994. These banks aim to preserve the heritage of olive varieties grown in countries around the world. The IOC network currently includes 22 national banks and three international collections (Cordoba, Spain; Marrakech, Morocco; and Izmir, Turkey) that preserve all the varieties of the network located in different countries covering three different climatic zones.

The True Healthy Olive Cultivar (THOC) project aims to give a new impetus to the IOC network and provide authenticated and healthy initial material of the main commercial varieties of each country of the IOC network of germplasm banks. A certification system will be promoted to ensure varietal authenticity and free material from the pathogens listed in the directives issued by the EU/EPPO. Authentic and healthy varieties will be provided to banks to be preserved as initial material in the corresponding isolated conservatories. This step will be the starting point for developing certification protocols for nursery stock.

The network contains approximately 1,700 cultivars. The first phase of the THOC project is to authenticate and catalogue 101 commercial varieties using morphological and molecular descriptors (SSRs). In the second phase, these varieties will be authenticated and sanitised to ensure that they are free of the pathogens required by the certification of nursery stock policies. To this end, isolated conservatories will be set up. The second step should be accomplished as soon as possible, given the scale of epidemics caused by pathogens such as *Verticillium* and *Xylella fastidiosa*.

The goal of this seminar is to:

1. Review the current status of the banks in the network;
2. Define and adopt a protocol for authenticating genetic resources in the network;
3. Present the status of the THOC project and the activities schedule;
4. Propose new joint activities.
